

PhD in Geobiology

DEPARTMENT OF EARTH SCIENCES
INDIANAPOLIS

The Gilhooly lab is recruiting a PhD student to study how viral infection controls purple and green sulfur bacteria. The student will work with a team of virologists and geochemists supported by a NASA Exobiology grant.

We seek an applicant with a background in biogeochemistry or microbiology. The research involves field work, isotopic analyses, and microbial mesocosm experiments.

Those interested, contact Bill Gilhooly, wgilhool@iu.edu.

Position starts Fall 2024. Application due by January 15, 2024
